**COCOA PROCESSING COMPANY LIMITED**  
**NOTES TO THE FINANCIAL STATEMENTS**  
**FOR THE FOURTH QUARTER ENDED 30TH JUNE 2023**

**1. REPORTING ENTITY**

Cocoa Processing Company Limited is a Company registered and domiciled in Ghana. The financial statements for the Second quarter ended 30<sup>th</sup> June 2023 relates to the individual financial statements of the Company.

**2. BASIS OF PREPARATION**

**a. Statement of compliance**

The financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) and in the manner required by the Companies Act 1963 (Act 179).

**b. Basis of measurement**

The financial statements have been prepared under the historical cost convention, except for the following material items in the statement of financial position:

- Property, plant and equipment, measured at revalued amounts
- Defined benefit obligations measured at the present value of the future benefit to employees.

**c. Functional and presentation currency**

The financial statements are presented in US Dollar (US\$) which is the Company's functional currency. Except otherwise indicated, the financial information presented has been rounded off to the nearest US Dollar.

**d. Use of estimates and judgement**

In preparing the financial statements, management has made judgments, estimates and assumptions that affect the application of the Company's accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to estimates are recognised prospectively.

### 3. SIGNIFICANT ACCOUNTING POLICIES

The accounting policies set out below have been consistently applied to all periods presented in these financial statements.

#### (a) Foreign currency transactions

Transactions in foreign currencies are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the exchange rate at the reporting date.

Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in profit or loss under operating expenses or other income depending on whether it is a net loss or gain.

Non-monetary items that are measured based on historical cost in a foreign currency are translated at the exchange rate at the date of the transaction.

#### (B) Property, plant and equipment

##### (i) Recognition and measurement

Items of property, plant and equipment are initially recognised at cost. They are carried at revalued amounts less subsequent depreciation and impairment losses.

Cost includes expenditures that are directly attributable to the acquisition of the asset. The cost of self-constructed assets includes the cost of materials and direct labour, capitalised borrowing costs and any other costs directly attributable to bringing the asset to a working condition for its intended use. Purchased software that is integral to the functionality of the related equipment is capitalised as part of that equipment.

When parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

##### (ii) Subsequent expenditure

Subsequent expenditure is capitalised only if it is probable that the future economic benefits associated with the expenditure will flow to the Company and its cost can be measured reliably. The costs of the day-to-day servicing of plant and equipment are recognised in profit or loss, as incurred.

##### (iii) Spare parts

Spare parts, stand-by and servicing equipment held by the Company generally are classified as inventories. However, if major spare parts and stand-by equipment are expected to be used for more than one period or can be used only in connection with an item of property, plant and equipment, then they are classified as property, plant and equipment.

##### (iv) Capital work in progress

Property, plant and equipment under construction is stated at initial cost and depreciated from the date the asset is made available for use over its estimated useful life. Assets are transferred from capital work in progress to an appropriate category of property, plant and equipment when commissioned and ready for its intended use.

(v) *Depreciation*

Items of property, plant and equipment are depreciated from the date they are installed and ready for use, or in respect of self-constructed assets, from the date assets is completed and ready for use.

Depreciation is calculated to write off the cost of items of property, plant and equipment less their estimated residual values using the straight -line method over their estimated useful lives. Depreciation is generally recognised in profit or loss unless the amount is included in the carrying amount of another asset.

The estimated useful lives for the current and comparative years of significant items of property, plant and equipment are as follows:

• Land, Buildings and Road Works	-	50 years
• Staff Bungalows and Flats	-	50 years
• Plant and Machinery	-	20 years
• Motor Vehicles	-	4 years
• Laboratory Equipment	-	5 years
• Office Furniture and Equipment	-	5 years

Depreciation methods, useful lives and residual values are reviewed at each reporting date and adjusted if appropriate.

(vi) *Revaluation gain/loss*

Increases in the carrying amount of land and buildings arising on revaluation are credited to a revaluation reserve. Decreases that offset previous increases of the same asset are charged against the revaluation reserve. All other decreases are charged to profit or loss.

The surplus on revaluation is transferred to retained earnings on use of the relevant revalued assets.

**(c) Inventories**

All inventories with the exception of finished goods are initially recognised at the lower of cost and net realisable value. Finished goods are initially recognised at the total cost of raw materials consumed and production overheads. Inventories are measured at the lower of cost or net realisable value.

The cost of inventories is based on the first-in-first-out principle for raw materials and weighted average principle for all other inventories and includes expenditure incurred in acquiring the inventories, production or conversion costs and other costs incurred in bringing them to their existing location and condition. In the case of manufactured inventories and work in progress, cost includes an appropriate share of production overheads based on normal operating capacity.

Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and estimated costs necessary to make the sale. Inventories are recognised in profit or loss when goods are sold or there is a write down of inventories.

**(d) Revenue**

Revenue is measured at the fair value of the consideration received or receivable, net of VAT, returns, discounts, and other similar deductions.

No revenue is recognised if recovery of the consideration is not considered probable or the revenue and associated costs cannot be measured reliably.

**Revenue - Sale of goods**

Revenue from the sale of goods is measured at the fair value of consideration received or receivable, net of returns, trade discounts, taxes and volume rebates. Revenue is recognised when significant risks and rewards of ownership have been transferred to the buyer, there is no continuing management involvement in the goods, recovery of the consideration is probable, associated costs and possible return of goods can be estimated reliably and the amount of revenue can be measured reliably. Transfer of risks and rewards occur when the goods are delivered to the customer.

**(e) Finance income and finance costs**

Finance income comprises interest income on funds invested or held in bank accounts. Interest income is recognised in profit or loss using the effective interest method.

Finance costs comprise interest expense on borrowings. Borrowing costs that are not directly attributable to the acquisition, construction or production of a qualifying asset are recognised in profit or loss using the effective interest method.

**(C) Risk management**

The Company has exposure to the following risks from its use of financial instruments:

- credit risk
- liquidity risk
- market risk

This note presents information about the Company's exposure to each of the above risks, the Company's objectives, policies and processes for measuring and managing risks and the Company's management of capital.

**Risk management framework**

The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The Audit Committee is responsible for monitoring compliance with the Company's risk management policies and procedures, and for reviewing the adequacy of the risk management framework in relation to risks faced by the Company.

The Audit Committee gains assurances on the effectiveness of internal control and risk management from summary information relating to the management of identified risks; detailed reviews of the effectiveness of management of selected key risks; results of management's self assessment processes over internal control; and independent work carried out by the Audit and Risk function, which provide the audit committee and management with results of procedures carried out on key risks, including extent of compliance with standards set on governance; and assurances over the quality of the Company's internal control.

The Company also has a control, compliance and ethics function in place, which monitors compliance with internal procedures and processes and assesses the effectiveness of internal controls.

The Company's risk management policies are established to identify and analyse risks faced by the Company, set appropriate risk limits and controls, and monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions, products and services offered. Through training, standards and procedures, the Company aims to maintain a disciplined and constructive control environment, in which all employees understand their roles and obligations.

**(i) Credit risk**

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from receivable from customers.

*Trade receivables*

The Company's exposure to credit risk is influenced mainly by the individual characteristics of each customer. The marketing department has established a credit policy under which new customers are assessed individually for credit worthiness before the Company's standard payment terms and conditions are offered. The Company generally trades with pre-defined and selected customers. Credit exposure on trade receivable is covered by customers issuing post-dated cheques to cover amounts owed, as well as using landed properties as collateral and bank guarantees.

*Allowances for impairment*

The Company establishes an allowance for impairment losses that represents its estimate of incurred losses in respect of trade and other receivables. The main components of this allowance are a specific loss component that relates to individually significant exposures, and a collective loan loss allowance established for homogeneous assets in respect of losses that have been incurred but have not yet been identified. The collective loss allowance is determined based on historical data of payment for similar financial assets.

(ii) **Liquidity risk**

Liquidity risk is the risk that the Company would either not have sufficient financial resources available to meet all its obligations and commitments as they fall due, or can access them only at excessive cost. The Company's approach to managing liquidity is to ensure that it maintains adequate liquidity to meet its liabilities as and when they fall due. The Company assesses its debt position every month. The Company also monitors the level of expected cash inflows on trade and other receivables on a daily basis. The Company however has a net liability position. Measures have been put in place as disclosed in note 28 to manage this position.

(iii) **Market risk**

Market risk is the risk that changes in market prices, such as foreign exchange rates and interest rates will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

*Foreign currency risk*

The Company is exposed to currency risk on sales, purchases and borrowing that are denominated in a currency other than the functional currency of the Company, the US Dollar. The Company has no policy on its exposure to foreign currency risk relating to its financial assets and financial liabilities. Currency risk arises when future commercial transactions or recognised assets and liabilities are denominated in a currency that is not the entity's functional currency.

**Capital management**

The Board's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business. Capital consist of equity. The Board of Directors monitors return on capital as well as the level of dividends to ordinary shareholders.

The Board seeks to maintain a balance between higher returns that might be possible with higher levels of borrowings and the advantages and security afforded by a sound capital position. There are no externally imposed capital requirements.

There have been no changes to what the entity manages as capital, the strategy for capital maintenance or externally imposed capital requirements from the previous year.

The Board monitors capital using an adjusted net debt to equity ratio, which is the adjusted net debt divided by the adjusted equity. For this purpose, adjusted net debt is defined as total liabilities (which includes interest bearing loans and borrowings) unaccrued proposed dividends less cash and cash equivalents. Adjusted equity comprise all components of equity less unaccrued proposed dividends.

## GOING CONCERN CONSIDERATION

The Directors have also been in discussions with African Export-Import Bank (Afreximbank) to obtain a US\$86.7 million loan facility. Management plans to use this loan to settle outstanding amounts due to the syndicate of banks, support its working capital requirements and retool its property, plant and equipment to expand production capacity. Management expects the agreement to be signed latest by December 2023 and the first tranche of the loan to be disbursed from June 2024.

COCOBOD has undertaken to provide the Company with continuous supply of cocoa beans to meet its operational demand and will not demand for repayments of amounts due to it in a manner that would jeopardise the operations of the Company.

The Directors have assessed the situation and have put in place measures to turn around the Company and make it profitable in the near future. These measures include:

- i. Cost cutting measures – The company entered in to arrangement with Captive Energy Company Limited on 9 October 2019 to produce steam and power using bio-waste materials. The project is expected to be completed in 15 months. On completion, the Company will incur a monthly charge of US\$414,000 for the generation of steam and power which represents a reduction of the Company’s current utility cost of 40% per annum. The Company has also constructed six (6) depth bore-holes to reduce the cost of water by about US\$168,000 – US\$220,000 per annum.
- ii. Investment in infrastructure and machinery – The Company obtained a loan facility of GH16million from Prudential Bank Limited under the Government of Ghana’s Ministry and Trade and Industry Stimulus Package Programme for the acquisition of equipment for the Confectionery factory. The Company had acquired a number of the assets and had put them in use. The machines are intended to expand the capacity of the Confectionery factory from 3,000 MT to 15,000 MT. The Company has also commenced activities for the retooling of its aged cocoa factory lines and the expansion of the current capacity of 64,500 MT to 87,657 MT.
- iii. Collateral management agreement: There are also plans to enter into a collateral management agreement with Cocoa Marketing Company (CMC) for the purchase of cocoa beans. Under the arrangement, CMC would issue the Company with a letter of guarantee to supply the Company with 23,000MT of cocoa beans (main and light crop for every cocoa season with the light crop proportion larger than the main crop).
- iii. Investment in infrastructure and machinery – The Company plans to purchase additional Chocomaster (moulding plant), three new wrapping machines, drinking chocolate plant and also rehabilitate the milling section accessories and installation. These equipment are intended to increase chocolate production and the project will take a year to complete.
- iv. Expanding revenue base - The Company intends to expand its revenue earning base and has identified the following areas to achieve that:
  - Introduction of hand crafted-chocolates and customised chocolates (own label chocolate bars).
  - Introduction of Nutty chocolates (non-coated dragees)
  - Tolling arrangement with relevant parties.
  - Improving visibility to increase local consumption of Goldentree confectionery products.
  - Rebranding of Alltime instant drinking chocolate and the introduction of another instant drinking chocolate to be known as Goldentree instant drinking chocolate.
- v. Improving effectiveness and efficiency of operations - The Directors have in the short and medium term put in place measures to improve the effectiveness and efficiency of the Company’s operations by reviewing and improving the Performance Management System (PMS).

**REVENUE**

Cash and Cash Equivalents in the statement of cash flow	701,909	(569,084)

#### DEBT TO EQUITY RATIO

The Company's net debt to equity ratio was as follows

	Jun-23 US\$	Jun-22 US\$
Total Liabilities	128,305,237	210,500,493
Cash and Cash Equivalents	<u>(2,635,978)</u>	<u>(801,425)</u>
Net Debt	125,669,259	209,699,068
Equity	<u>12,272,421</u>	<u>(61,411,276)</u>
Debt to Equity Ratio	<u>10.24</u>	<u>(3.41)</u>

#### RELATED PARTY TRANSACTION AND BALANCES

The Company Purchases raw cocoa beans from Cocoa Marketing Company Limited a Subsidiary of Ghana Cocoa Board.

Ghana Cocoa Board is the ultimate parent of Cocoa Processing Company Limited. The purchases from Cocoa Marketing Company Limited are on the same terms and conditions as those entered into by other companies

The value of transactions between the company and its related entities during the year are as follows

	Jun-23 US\$	Jun-22 US\$
Purchases from Cocoa Marketing Company	17,520,210	12,917,500

Balances due related company were as follows

	Jun-23 US\$	Jun-22 US\$
Borrowings		27,308,567
Accrued Interest	18,546,160	16,981,435
	<u>18,546,160</u>	<u>44,290,002</u>
Trade Payable	15,170,898	64,176,398
	<u>33,717,057</u>	<u>108,466,400</u>

**NOTES TO THE FINANCIAL STATEMENTS (CONT'D)**

**14. SHARE CAPITAL (STATED CAPITAL) AND RESERVES**

**Authorised shares**

	<b>2023</b>	<b>2022</b>
Ordinary shares of no par value	20,000,000,000	20,000,000,000
Preference share of no par value	1	1

**Issued and fully paid**

	Number 'm	Amount US\$	Number 'm	Amount US\$
Ordinary shares for cash	2,038	26,071,559	2,038	26,071,559

**(a) Preference shares**

	Number		Number	
	1	71	1	71
		26,071,630		26,071,630

**(b) Deposit for Shares**

On 30<sup>th</sup> September 2022, the Board of Directors for Ghana Cocoa Board agreed to a proposal from the Board of Cocoa Processing Company to convert US\$ 87,000,000 of debt owed to Ghana Cocoa Board to Class B shares. The US\$ 87m debt converted to equity consisted of the principal portion of a long-term loan granted to Cocoa Processing Company of US\$ 32m and US\$ 55m being trade payables. The company is in the process of registering the new shares with the Registrar of Companies as required by the Companies Act 2019, Act 992.

**(c) Revaluation reserve**

This represents the unrealised appreciation on the value of property, plant and machinery, following a revaluation exercise carried out at 30 September 2019. The revaluation surplus is recorded in equity as it is a non-distributable reserve. The movement on the revaluation reserve resulted from transfer made to the retained earnings account in respect of portions of the revalued components of the relevant assets which were used during the year and deemed realised from use.

**(d) Fair Value Reserve**

The fair value reserve represents day – one gain on the fair valuation of below market-rate loans and borrowings from shareholders of the company.

**(e) Retained earnings (Income surplus account)**

This represents the residual of cumulative annual profits/losses and realised portions of revaluation reserve.
